P1	Making sketch for the prototype build plan	2026-10-03	AC
P2	KWL-DDR-003: tube 405 long for the shorter clamp	2026-10-03	AC

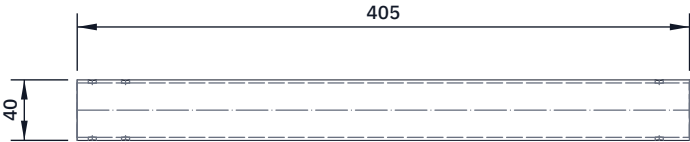

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Cut to 405 with a fine abrasive disc; square the ends
- Three 5.2 holes square through both walls on one line: 10, 32 and 385 from the inner end
- Drill through a wooden V block with a sharp brad-point bit; tape first
- Lightly sand 45 at the inner end and 40 at the outer end for bonding
- Make four; check all four are the same length within 0.5
