WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Block 50 x 60 x 52, bored 40.2 through on the split line, then sawn in two
- Four 4.3 holes 8 in from the ends and 4.5 in from the sides, through both halves
- Each outer face: four M4 x 9 deep on a 35 circle at 45 deg, for the motor bought
- 5.2 cross hole through both halves and the tube at the motor axis
- Face both halves flat so they close on the tube with 0.5 to 1 gap
- Check: the motor axis is square to the tube within 1 deg

Motor mount: making sketch
